ERICH BLOCH

LARRY W SUMNEY

1982

In 1982, SRC did not produce a corporate annual report.

On the other hand, SRC did get off to a fast start. After the appointment of Larry Sumney as Executive Director in March, the Board of Directors, chaired by Erich Bloch, faced an agenda that included: member recruitment, establishment of a Technical Advisory Board and a University Advisory Council, site selection, organizational structure, budgets and staffing.

And, of course, the research program: By the end of the first year, a request for proposals had been issued, and initial awards were made from the 166 responses received.
